CONCLUSION

Problem Statement

- In the digital era having an online Portfolio is essential for showcasing personal and professional details.
- traditional resume are statics while a Portfolio website provides an interactive way to highlight bio data, education, skills, and Projects.
- The problem is that many students and job seekers do not have a simple, structured and visually appealing digital portfolio to present themselves.

Project Overview

- The project aims to design and develop a personal Portfolio web page using HTML and CSS.
- The web page will contain the individual's bio data, skills, Hobbies, education, and personal information in a structured table format.
- A profile picture and simple layout enhance the professional look.

End Users

- **Student**—to—showcase their academic details and Skill.
- **Job seeker**—to—present resumes digitally to employer.
- **Freelancers**—to—demonstrate Skill and personal branding.
- **Professional**—to—maintain an online presence.

Tools and Technologies

HTML – for creating the structure of the portfolio

CSS 3 – for styling and layout design

Web browser – for testing [choose, edges, firebox]

Result and Screenshots

HOME PAGE WITH PROFILE
PICTURE AND TITLE

BIO-DATA TABLE WITH
DETAILS (NAME,
EDUCATION, SKILL, ETC)

conclusion

- This project demonstrates how to create a simple yet effective portfolio web page using basic web technologies (HTML & CSS).
- It serves as a digital identify for students and professional, making it easier to share information with Recruiters, institutions or client.
